MOUNIKA YERRA

Java Full Stack Developer | Oracle Fusion | Jersey REST | VBCS | ADF

India | +91-9494428866 / +91-7095350502 | mounika.yerra@gmail.com

PROFESSIONAL SUMMARY

Java Full Stack Developer with **12 years** of experience, including **7+ years at Oracle** building **Oracle Fusion Applications** features with **Java**, **Jersey REST** services, **Oracle VBCS**, **ADF** and **Oracle** databases. Currently builds **AI assurance workflows** in **Oracle Fusion AI Studio** that analyze security snapshot reports across **4 Fusion business processes**. Delivers features from UI to database, reduced production incidents through **root-cause analysis**, and mentors new team members.

TECHNICAL SKILLS

Backend: Java, Spring, Spring Boot, Jersey, REST APIs, Microservices, Shell Scripting
Frontend: Oracle VBCS, Oracle JET (OJET), Oracle ADF (JSFF), AngularJS, JavaScript, HTML, jQuery, AJAX
AI & Integration: Fusion Claw, Oracle Fusion AI Studio, AI Workflows, Prompt Design, BOSS Business Objects, JSON
Database & Security: Oracle SQL, Oracle 12c, Oracle 10g, OAuth2, Oracle IDCS
Tools & Delivery: Git, Maven, JDeveloper, Eclipse, Unit and Integration Testing, Incident Resolution

PROFESSIONAL EXPERIENCE (12 YEARS)

Software Engineer — Oracle India Pvt. Ltd., India

Mar 2019 – Present

Fusion Claw and AI Assurance Workflows | Fusion Claw, Oracle Fusion AI Studio, REST APIs, JSON, JavaScript, Git

- Developed **AI assurance workflows** in **Fusion Claw** and **Oracle Fusion AI Studio** that analyze security snapshot reports for **Source to Settle**, **Order to Cash**, **Record to Report** and **Hire to Retire**, reducing review time from about 2 hours to under **10 minutes**.
- Created **5+ reusable REST-backed business objects** that convert snapshot names to IDs and fetch report data, so every workflow can answer follow-up questions without duplicating API logic.
- Refined input parsing and **prompts** so workflows return counts backed by report evidence, raising answer accuracy on the team's test questions from about **70% to 95%**.
- Debugged workflow paths, API responses and draft synchronization issues, cutting failed runs by about **50%** before release.

Team and Team Goals | Oracle VBCS, Java, Jersey, REST APIs, BOSS

- Built **Team and Team Goals** features end to end across **VBCS** screens, **Jersey REST** services and **BOSS** business objects, enabling managers to create teams, assign goals and track progress in one place.
- Designed **10+ Jersey REST endpoints** for team, member and goal data, with input validation and consistent error responses.
- **Mentored 3 new team members** on VBCS, Jersey and BOSS through code reviews and pairing, enabling first feature delivery within a month.

Team and Team Goals Wellness Application | Oracle ADF, Oracle Database, jQuery, JDeveloper

- Delivered **15+ ADF/JSFF pages** and feature enhancements with UI and business validations, based on product requirements.
- Cut monthly incidents from **50 to 2** in 3 months through **root-cause analysis** and permanent fixes, adding **unit and integration tests**.

Software Engineer — IVY Comptech India Pvt. Ltd., India

May 2016 – Feb 2019

Java, Spring, JSP, Oracle Database, jQuery, AJAX, Eclipse

- Engineered self-service **reporting modules** for player details and batch association in **Java**, **Spring**, **JSP** and **Oracle**.
- Automated personalized welcome mailers from player data, sending **10,000+ emails per month** and replacing manual campaign setup.
- Tuned **Oracle SQL** queries and added **AJAX**-based loading, cutting report load times by about **50%** on tables with millions of records.

Programmer Analyst Trainee — Cognizant Technology Solutions, India

Jun 2014 – Apr 2016

- Resolved **100+ customer incidents** across **PHP** and **Java** modules within SLA targets.
- Prepared weekly and monthly reports for client stakeholders and implemented **10+ minor enhancements** to existing modules.

SELECTED PROJECTS & HIGHLIGHTS

Spring Boot Microservices with OAuth2 Security | Spring Boot, REST APIs, OAuth2, Oracle IDCS, AngularJS

- Architected **3 Spring Boot microservices** that communicate through **REST** endpoints, each owning its own data and business logic.
- Secured the services with **OAuth2**, using **Oracle IDCS** for token-based authentication and role-based authorization.
- Implemented **AngularJS** UI components that consume the APIs, completing the flow from login to data display.

EDUCATION

B.Tech in Information Technology | JNTU Hyderabad | 85.6% *2014*

ACHIEVEMENTS

- Selected as **Top-Techie** in the Cognizant gamification and training program, and received the **PAT on Your Back** award at Cognizant.
